Address: Ho Chi Minh, Viet Nam

Overview

I have over a year of experience in web development using ReactJS, during which I have successfully created interactive and responsive applications. My background includes exposure to various web programming languages within the JavaScript ecosystem, providing me with a strong foundation in front-end development. I am committed to continuous learning and seek to expand my skill set by exploring new technologies and best practices, ensuring I stay at the forefront of the ever-evolving web development landscape.

Education

TON DUC THANG UNIVERSITY

Major - Computer Networks And Data Communications

GPA: 6.8/10

Skills

- **Front-End Development:** HTML, CSS, JavaScript, jQuery, ReactJS, Typescript, VueJS, Bootstrap, TailwindCSS, RESTful API.
- **Back-End Development:** ASP.NET Core Web API, Java Spring Boot, PHP.
- **Database management:** MySQL, SQL Server.

Work experience

03/2024 – 09/2024

FPT SOFTWARE

- Fix bugs when functionality fails to ensure system reliability.
- Modify functionality based on customer requirements for both front-end and back-end.
- Update test cases and test scripts to maintain testing accuracy and comprehensive coverage.
- Update the database to support functionality testing and ensure data integrity.
- Collaborate with the development team to identify and resolve issues promptly.
- Technologies: Utilized ReactJS and TypeScript for front-end development, Java Spring Boot for back-end, and Oracle for database management.

07/2023 – 09/2023

VITAX COMPANY

- Call API to display customer invoice data on Tabulator dashboard.
- Create a real-time tax risk lookup page.
- Optimize the system interface based on customer feedback.
- Implement user authentication and authorization.
- Integrate a notification system to alert users to invoice risks.
- Technology: Use Vue.js and Bootstrap for dynamic, responsive UI components, ensuring consistent design across devices.

REAL ESTATE PROJECT

(02/2024 – 05/2024)

Descriptions	<p>Back – end:</p> <ul style="list-style-type: none"> • Implemented JWT for secure user authentication. • Developed CRUD functionalities for data. • Created and configured API endpoints. • Set up email system for notifications and updates. <p>Front – end:</p> <ul style="list-style-type: none"> • Created login, registration, and password recovery pages. • Built admin interface for managing listings and transactions. • Developed main page for searching and filtering real estate. • Designed results page to display filtered listings. • Built detail view page for comprehensive property information.
